

Analysis report **2021295_2**
Page 1/1
Date: 30 August 2021
Sample: Hemp plant
Sample designation: 2021295.0002
Incoming date: 20.08.2021

Sample designation	Sample	Analyte	Mass fraction [%]	HPLC method
2021295.0002	B52	CBDA	14.28	LAAV40601.7
		CBD	0.28	LAAV40601.7
		total CBD ^{a)}	12.80	-, calculated
		CBN	<0.05	LAAV40601.7
		Δ^9 -THC	<0.05	LAAV40601.7
		Δ^9 -THCA	0.58	LAAV40601.7
		total Δ^9 -THC ^{a)}	0.51	-, calculated
		CBDV	<0.05	LAAV40601.7
		CBGA	0.72	LAAV40601.7
		CBG	0.10	LAAV40601.7
		CBC	<0.05	LAAV40601.7

Remarks:

These results relate only to the sample being analyzed and are not readily transferable to the entire batch or plant variety. The customer alone is responsible for ensuring that the sample sent to us is representative of the batch under test.

a) Calculation uncertainty: if one of the measured values (CBDA, CBD, THC, THCA) is below 0.05% (limit of quantitation of the method), then the calculated total value may still be higher by approximately this amount.
